## Abstract

Described herein are compounds that are useful as protein kinase inhibitors having the formula:

$$R^3U_n$$
 $NH$ 
 $Z^1$ 
 $Z^1$ 
 $Z^2$ 
 $Z^1$ 
 $Z^2$ 
 $Z^$ 

wherein  $Z^1$  and  $Z^2$  are each independently nitrogen or CH and Ring A,  $T_m R^1$ ,  $Q R^2$ ,  $U_n R^3$ , and Sp are as described in the specification. The compounds are especially useful as inhibitors of ERK2 and for treating diseases in mammals that are alleviated by a protein kinase inhibitor, particularly diseases such as cancer, inflammatory disorders, restenosis, diabetes, and cardiovascular disease.
